

X20 Applications

Steering Assist

Steering Assist Console

Provides smooth precise steering in any terrain
- eases operator fatigue, and reduces machine wear and tear.

- Reduces overlap and input costs
- 24/7 operation in wind, heat, dust or fog
- Fully compatible with over 80 different tractors, sprayers and harvesters
- Integrated controller, guidance and steering assist console
- Parallel, concentric (round and round), spiral and contour guidance patterns

X20 Steering Assist

Topcon's PRO Steer together with X20 Guidance provides real-time on-screen guidance and mapping with the industry's simplest work platform, the X20 all-in-one control console.

X20 PRO Steer is compatible with most DGPS receivers and the full range of positioning accuracies ranging from DGPS free-to-air marine beacon, WAAS, subscription systems (including OmniSTAR VBS and HP), Real-time Kinetic (RTK) radio and network systems.

PRO Steer incorporates a three-axis gyro and tilt sensor, which ensures optimum steering assist performance in all types of terrain. The advanced proportional valve system and software design provides smooth steering assist, reduces machine wear and tear, and eases operator fatigue.

Wide Range of Compatibility

PRO Steer kits are available for most brands and models of tractors, harvesters or sprayers equipped with hydraulic steering, including tracked and open center hydraulic equipment.

PRO Steer is also available for "Steer Ready" equipment and requires no changes to existing hydraulics - reducing installation time and costs.

Easy Installation

PRO Steer Steering Assist is designed for ease of installation and calibration. The installation kit includes the hydraulic block, hoses, wiring harness, and calibration software. Transfer kits that incorporate hydraulics and hoses are available for all equipment.
